

## Sådan uploader du filer, billeder, video og andet til Buzztouch

En meget vigtigt feature i Buzztouch, er at du kan arbejde med billeder, video, filer og scripts. Men for at du kan arbejde med dem, skal du uplade dem til Buzztouch. Denne guide viser dig hvordan.

Gå ind i din apps kontrol panel og vælg "Files/Media"

The screenshot shows the Buzztouch File Manager interface for TestApp99. The top navigation bar includes links for Home, How it Works, Buzztouch Blog, Self Hosting, Plugins, Forums, How To's, Buzz Map, and About. Below this is a secondary navigation bar with links for Applications, TestApp99, App Icon, Core, Layout, Themes, Menus, Screens, Logins, Files, and Configuration Data. The main content area is titled 'File Manager for TestApp99' and features a search bar and a list of folders: All Files (0), Documents (0), Images (0), Audio (0), Video (0), and PHP Scripts (0). An 'Upload File' section is visible, with a dropdown menu set to 'Upload to Documents', a text input field, and an 'upload' button. A table with columns for Filename, Folder, Mime-Type, Size, and Modified is also present, along with an 'About the File Manager' section containing instructions on allowed file types, searching, and sorting.

Nu ser du et tomt bibliotek - der er jo ikke uploadet noget endnu!

Under "Upload file" vælger du det bibliotek hvor du vil lægge din fil. F.eks. vil jeg gerne lægge et pdf-dokument op så jeg vælger "Upload to Documents" og klikker på det grønne plustegn

Nu kommer der en filvælger (standard Mac) og du vælger den fil du vil uplade.

Klik så på "Submit".

Når din upload er klar klikker du på "Ok, hide this message"

Nu kan du se din fil i det bibliotek du har valgt. I eksemplet har jeg lagt en pdf fil ind i "Documents".

**?** **About the File Manager**

The File Manager allows you to keep all the assets for the application organized. It also allows you to stream images, audio, video, and other documents from the server to the mobile device.

**Allowed File Types:** .jpg, .jpeg, .png, .pdf, .zip, .html, .txt, .csv, .doc, .docx, .xls, .xlsx, .ppt, .pptx

*Note:* Control panels hosted at buzztouch.com do not allow Audio, Video, or PHP Script uploads. "Point" to these types of files on your website from a screens advanced properties or host your own control panel.

**Searching::** Click a letter to find files that begin with that letter or enter a filename in the search box to find filenames that contain the search term. Tip: Enter a file extension (such as .pdf) to find all files of that type.

**Sorting:** Click column headers to order by that column. Click again to reverse the order.

Alle filer/dokumenter/billeder og videos kan nu frit bruges i alle screens i den pågældende app.

Du vælger din fil fra den enkelte screen!
