

Sådan opretter du en ny app i Buzztouch

Her vil du kunne se en skridt-for-skridt anvisning på hvordan du opretter en ny app i Buzztouch!

NB! Jeg forudsætter at du har logget ind i Buzztouch og har oprettet en profil.

Du starter ved at gå ind på din egen side/din egen profil.

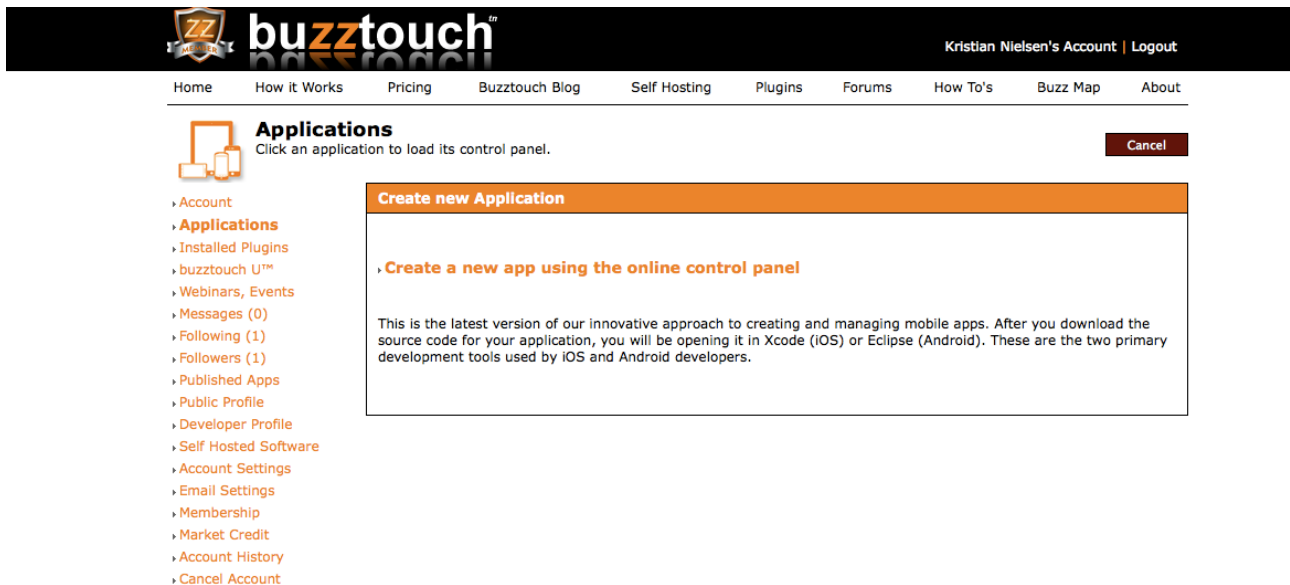

The screenshot shows the user profile for Kristian Nielsen. At the top, there is a navigation bar with links: Home, How it Works, Pricing, Buzztouch Blog, Self Hosting, Plugins, Forums, How To's, Buzz Map, and About. The user's name is Kristian Nielsen, with the tagline "Code is Art" and "Copenhagen". He has 2,330 points. A "Buzztouch Member" badge is visible, showing "Max Apps in control panel: 50" and "Market Credit: \$3.07". Below the profile, there is an "Account Control Panel" section that states "You are a Buzztouch MEMBER" and provides details: "Joined: Tuesday, May 28th, 2013", "Expires: Thursday, May 28th, 2015 (237 days from now)", and "Rate: \$49.99 / Annually". A "Renew Membership" link is provided. To the right of this panel is a "ZZ MEMBER" shield badge. Below the panel, a note states: "Memberships expire one year after purchase. We do not keep payment information and we will not automatically charge your account when you membership expires. We'll do our best to remind you to renew when the time comes." On the left side of the profile, there is a list of account settings: Account, Applications, Installed Plugins, buzztouch U™, Webinars, Events, Messages (0), Following (1), Followers (1), Published Apps, Public Profile, Developer Profile, Self Hosted Software, Account Settings, Email Settings, Membership, Market Credit, Account History, and Cancel Account.

Vælg punktet "Applications"

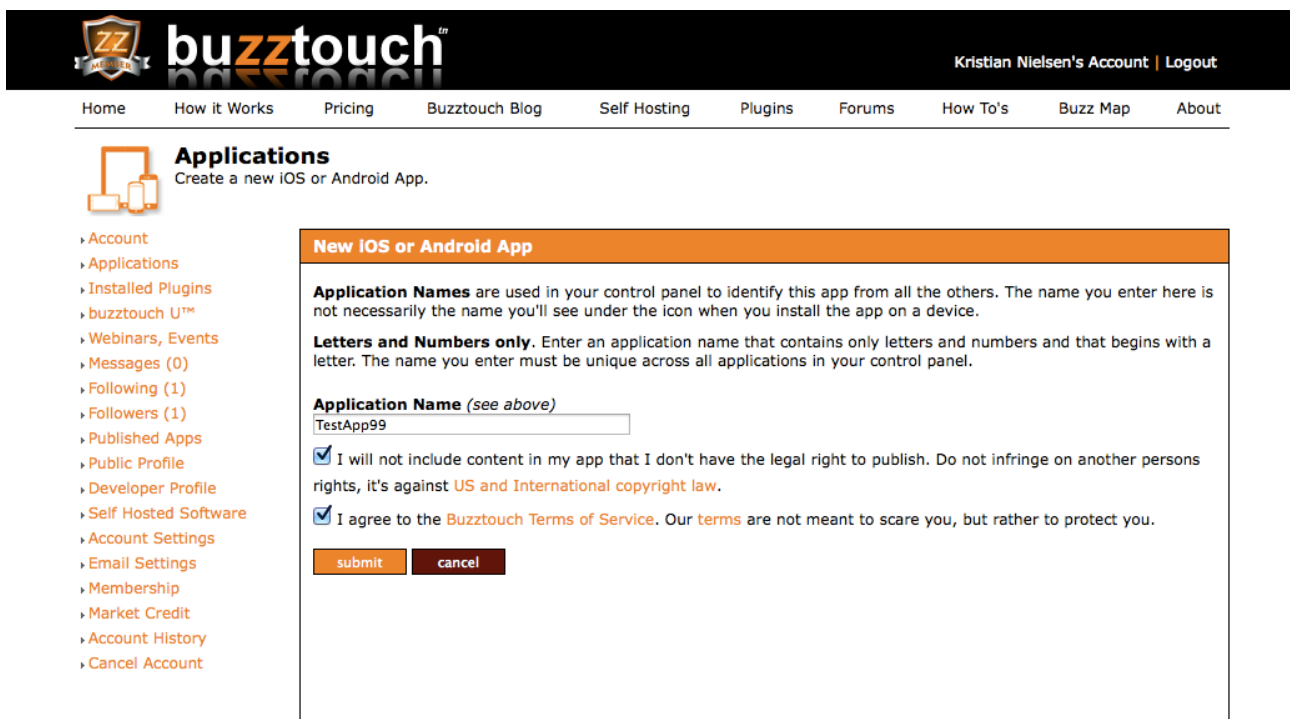

herefter ser du en oversigt over de apps du har lavet.

The screenshot shows the "Applications" page in the Buzztouch interface. The navigation bar is the same as in the previous screenshot. The page title is "Applications" with a sub-header "Click an application to load its control panel." and a "+ New App" button. On the left, the account settings menu is visible, with "Applications" highlighted. The main content area displays a grid of application cards. Each card includes an icon, the app name, creation and modification dates, version, and view count. The applications shown are: GuideOros13, iKajak2013, WCH13, AirmenDK, DTTMaster, AndroidTestApp, Madbiblioteket, BurgerCo, WCH2013, and Testapp1.

Vælg punktet "New App" - det er den lille orange knap øverst til højre

Klik på punktet "Create a new app using the online control panel"

Her skal du indtaste et navn til din app - i eksemplet har jeg givet appen navnet "Testapp99". Accepter dernæst de to punkter omkring ophavsret og service betingelser ved at sætte et hak i de to felter. Klik derefter på "Submit"

The screenshot shows the Buzztouch website interface. At the top, there is a navigation bar with the Buzztouch logo and the user's name 'Kristian Nielsen's Account' with a 'Logout' link. Below the navigation bar, there are several menu items: Home, How it Works, Pricing, Buzztouch Blog, Self Hosting, Plugins, Forums, How To's, Buzz Map, and About. The main content area is titled 'Applications' and includes a sub-header 'Create a new iOS or Android App.' On the left side, there is a sidebar menu with various options like Account, Applications, Installed Plugins, etc. The central part of the page displays a success message in a box: 'New iOS or Android App' with a green 'ok' icon and the text 'TestApp99 Created Successfully'. Below this message are two links: 'Continue to this application's control panel' and 'Show my list of apps again'.

Du får så bekræftet at din app er blevet oprettet og du skal nu **klikke på "Continue to this applications's control panel"** for at komme ind til app'en hvor du nu skal til at arbejde med den.

This screenshot shows the 'TestApp99' control panel in the Buzztouch interface. The top navigation bar is identical to the previous screenshot. Below it, the breadcrumb trail reads 'Account | Applications | TestApp99'. On the left, there is a sidebar menu with options like 'App Icon', 'Core Properties', 'Layout / Tabs', etc. The main content area features a summary box for 'TestApp99' with a question mark icon, creation and modification dates, and version information. To the right, there are three informational sections: 'It's best to design and build your app with the iOS Simulator Running', 'Themes allow you to make global changes...', and 'Menus and Screens make up the bulk of your app...'. An image of an iPad and two smartphones is shown on the right side. At the bottom, there is a box titled 'About Version, Modified and Published' explaining the red dot indicator.

Din app er nu oprettet men er helt tom. Nu skal du til at fylde data i den!
